

## Flange Mount Rotary Pulse Generator

Omega Engineering has introduced its new series of flange mount rotary pulse generators. The ZDH series features high-precision accuracy; NPN open collector output; quadrature outputs with indexing; NEMA 4, IP66 environmental rating; and is available in 100 or 1,000 pulses per revolution. The ZDH series of sensors are heavy-duty, rugged, yet compact encoders designed for harsh factory and plant floor environments. Typical applications include motion control feedback, machine control, process control, robotics, and food processing.
